

Announcement

ODP Forms are Now Available on the OCS Website

ODP Communication Number: Announcement 081-10

Audience: All Interested Parties

Purpose: To announce that ODP has created a repository to contain the forms to be used by various stakeholders

The Office of Developmental Programs has created a repository on the Office of Developmental Programs Consulting System (OCS) website www.odpconsulting.net to assist the field in locating needed forms.

The path to the form repository is www.odpconsulting.net → *ODP Forms* (which is located on the left sidebar under the menu box *ODP Resources*). The website lists the forms by form number and name (i.e. DP 1023 Request for Exception to the Established Service Limits or MA-51 Medical Evaluation).

While this site is open to all interested parties, please keep in mind that some of the forms are to be completed by a person with a specific role that has been identified in the process.

All forms are in PDF format. Some of the forms contain instructions for completion, and other forms are designated as User Friendly (UF). UF designated forms allow the user to enter information directly on the form; however the information can not be saved. The user must print the completed form, then scan and email or fax a hard copy to the receiver. Be sure to print UF forms prior to closing the document, or all of the information that was entered will be lost.

ODP recognizes that a few links to the forms, previously communicated, did not function properly. Please use this website to locate those forms.

ODP plans to post all forms to this site as they are finalized and will reference this site in future communications that contain forms.

Thank you for your continued cooperation and efforts.
